Professional summary

I'm a clinical dietitian, currently employed as a researcher at Centre for Nutrition, University of Bergen. In my PhD project I used targeted metabolomics to explore the regulation of one-carbon metabolism and B-vitamin status. The project included experimental studies in animals and epidemiological studies in humans. My main professional interests are methods in nutritional epidemiology and statistics, including programming in the R language. In 2019 I was leader of the organizing committee for the annual conference of the Norwegian Association of Clinical Dietitians.
